

Capabilities Statement

DotWave Solutions is a cybersecurity consulting and training firm founded by award-winning professor, Dr. Oludotun “Dot” Oni. We help our clients navigate the ever-changing world of technology, implementing solutions to protect them amidst current and potential cyber threats. We educate organizations on industry best practices to improve their security positions and mitigate their risk. We offer custom training programs based on each client’s specific needs. We also help organizations address compliance requirements such as PCI-DSS, HIPAA, CMMC, NIST, and more.

We have a wide range of consulting and information security services covering several major industries such as private enterprise, government, healthcare, and more. Our mission is to ensure the integrity and security of each client's data.
