

Capabilities Statement

DotWave Solutions is a cybersecurity training and consulting firm founded by award-winning professor, Dr. Oludotun “Dot” Oni. We educate organizations on industry best practices to improve their security position and reduce cyber risks. We offer custom courses and training based on each client’s specific needs. We also help organizations address compliance requirements such as PCI-DSS, NIST, and more. We have a wide range of consulting and information security services covering several major industries such as private enterprise, government, healthcare, and more.

We help our clients navigate the ever-changing world of technology, implementing solutions to improve their security positions and protect them amidst potential cyber threats. Our mission is to ensure the integrity and security of each client's data.
